PROFESSIONAL SUMMARY

Software Developer and IT Engineer with 5+ years building and deploying cross-platform apps (iOS, Android, Web) and managing full IT infrastructure — across construction, retail, and hospitality sectors. Skilled in Flutter/Dart, Python, and full-stack development; holds a B.Sc. in Computer Engineering (Lebanese French University, 2026).

WORK EXPERIENCE

Software Developer | Usama Auto — Wholesale Car Accessories 2022 – Present

- Independently designed and developed a full-featured e-commerce platform (iOS, Android & Web) using Flutter/Dart, serving real customers and driving sales operations entirely through the app.
- Architected a scalable product catalog, order management system, and customer-facing UI, reducing manual order processing time by an estimated 60%.

IT Manager & Software Developer | Rast To Rast Construction Office 2018 – 2022

- Served a dual role managing the full IT infrastructure while simultaneously developing a custom Client Tracking and Management System (RTR CTMS) for invoices, billing, and project documentation.
- Built and deployed internal software that replaced paper-based workflows, significantly reducing billing errors and improving document retrieval speed.

Technical Support Specialist | Aqua Pool 2021 – Present

- Provided ongoing hardware and software troubleshooting, ensuring minimal downtime across operational systems.

KEY PROJECTS

Usama Auto App [Flutter, Dart, Firebase, REST API]

- Built a production-grade e-commerce app from scratch for iOS, Android, and Web — live and actively used by real customers for car accessories purchasing.

RTR CTMS — Client Tracking & Management System [Flutter, SQL, Dart]

- Developed a fully custom CRM and billing platform for a construction company, automating invoice generation, client records, and project financial tracking.

Servex — Offline POS System [Flutter, Dart, SQLite]

- Engineered a fully offline Point-of-Sale system tailored for coffee shops and restaurants, with no dependency on internet connectivity.

TECHNICAL SKILLS

Languages	Python, Dart, JavaScript, SQL, Bash
Frameworks	Flutter, REST API Integration, Telegram Bot API
Databases	SQLite, Firebase, SQL Server
Platforms	iOS, Android, Web, Windows, macOS
IT & Networking	Network Setup & Maintenance, Server Configuration, Hardware Troubleshooting
Tools	Git, MS Office Suite, Adobe Photoshop, System Debugging & Optimization

EDUCATION

B.Sc. Computer Engineering | Lebanese French University — Erbil 2022 – 2026
Graduated in 2026 with a B.Sc. in Computer Engineering, building on a strong practical foundation in software development and IT systems.

Diploma — Information Technology (CIS) | CIS College Erbil 2017 – 2022
Completed a comprehensive IT diploma covering networking, systems administration, software fundamentals, and technical support.
